Treatment is used for control, not cure. The patient has phlebotomy (removal of blood, usually a pint every other day) until the hematocrit reaches a normal level. Then blood is removed every few months as needed. Aspirin was previously documented as treatment for MPN, NOS. This was found to be incorrect. Treatment has been updated based on the NCI website. . Aspirin is given to patients with ...

Description. After literature and policy review, staff members discussed the effect of blood culture contamination. Emphasis was placed on hand washing and following the steps exactly as prescribed in the blood culture collection policy (no omissions or shortcuts), treating the procedure as a "sterile procedure" with emphasis on setup and masking for the procedure, and follow-up with every ...
