Similar triangles. In geometry two triangles, ABC and $A'B'C'$, are similar if and only if corresponding angles have the same measure: this implies that they are similar if and only if the lengths of corresponding sides are proportional. It can be shown that two triangles having congruent angles (equiangular triangles) are similar, that is, the corresponding sides can be proved to be ...

Similarity (geometry) - Wikipedia

The coordination geometry of an atom is the geometrical pattern formed by atoms around the central atom. Inorganic coordination complexes. In the field of inorganic coordination complexes it is the geometrical pattern formed by the atoms in the ligands that are bonded to the central atom in a molecule or a coordination complex. The geometrical arrangement will vary according to the number and ...
