1 Make sense of problems and persevere in solving them. Mathematically proficient students: • start by explaining to themselves the meaning of a problem and looking for entry points to its solution. • analyze givens, constraints, relationships, and goals. • make conjectures about the form and meaning of the solution.

COMMON CORE STATE STANDARDS FOR MATHEMATICS

July's Problem. Represent the number by a rectangle of $3 \times 5 = 15$ sections The 5 gray sections below represent $5/15 = 1/3$ of the number. The 3 crossed out sections represent $3/15 = 1/5$ of the number. Then the third diagram represents the difference of 4 by two sections that are shaded but not crossed out.

Problem of the Month

Josh's note: In this problem, ANY new combination of the 7 given digits will produce a number divisible by 9. So in a sense this is a "trick problem." The way the problem was written made some people think that only certain combinations of the digits would result in a number divisible by 9.
