AC Resources — CPM Educational Program

In this section we will introduce two problems that we will see time and again in this course : Rate of Change of a function and Tangent Lines to functions. Both of these problems will be used to introduce the concept of limits, although we won't formally give the definition or notation until the next section.

Calculus I - Tangent Lines and Rates of Change

* Global warming is defined by the American Heritage Dictionary of Science as “an increase in the average temperature of the Earth’s atmosphere,” either by “human industry and agriculture” or by natural causes like the Earth has “experienced numerous” times “through its history.”

Global Warming - Just Facts

Temperature is another important variable. The above properties were measured at room temperatures. As temperatures increase up to the limit of 1,063°F (573°C) mentioned in Endnote 81, the piezoelectric coefficient increases and breakdown voltages decrease—both contributing to more extensive and powerful plasma production.. 81.

If you want more data on life support than you know what to do with, try reading this NASA document. Otherwise, read on. For some great notes on spacecraft life support, read Rick Robinson's Rocketpunk Manifesto essay.. As a very rough general rule: one human will need an amount of mass/volume equal to his berthing space for three months of consumables (water, air, food).

THE MOST IMPORTANT INDEPENDENT VARIABLES IN FERMENTATION. There are two key independent variables worth considering: (a) Sugar concentration. After crushing the grapes the next step in the making of wine is the fermentation of the grape juice and pulp with various yeasts and bacteria.

Senior Chemistry - Extended Experimental Investigations

I've created this special page on my blog to house all of the posters I have created for my classroom over the past few years. I have made them free for you to download and use in your own classroom as a way to say thank you to the thousands of people I've stolen teaching ideas from on the internet.

Math = Love: Free Classroom Posters

In 1694, Rudolph Jakob Camerarius, in De Sexu Plantarum Epistola, reported the existence of sex in flowering plants.: In 1698, Thomas Savery patented an engine which produced a vacuum by condensing steam. It was employed for raising water from a mine and supplying water to several country houses. In 1704, Newton, in Opticks, presented his discoveries using light and elaborated his theory that ...
