Show how Plato's criterion for knowledge requires the existence of a particular kind of 'object' or 'thing'--the objects of knowledge, and hence the goal of the practice of philosophy.

Newest Plato Questions | Wyzant Ask An Expert

Machine Learning is an interdisciplinary field that uses statistics, probability, algorithms to learn from data and provide insights which can be used to build intelligent applications. In this article, we will discuss some of the key concepts widely used in machine learning.

Machine Learning — Probability & Statistics - Towards Data ...

Statistics investigates and develops specific methods for evaluating hypotheses in the light of empirical facts. A method is called statistical, and thus the subject of study in statistics, if it relates facts and hypotheses of a particular kind: the empirical facts must be codified and structured into data sets, and the hypotheses must be formulated in terms of probability distributions over ...
