For answers, see the Teachers's Edition. Water in the Atmosphere Guided Reading and Study Use Target Reading and Skills This is one possible way to complete the graphic organizer. Accept all logical answers. How does the water cycle work? (Water evaporates from the surface, condenses to form clouds, and falls to Earth as rain or snow.)

www.duxbury.k12.ma.us

determined by two main factors: temperature and precipitation. The same factors that affect climate regions also affect small areas. Microclimates are small areas with climate conditions that differ from those around them. The main factors that influence temperature are latitude, altitude, distance from large bodies of water, and ocean currents.
