Microeconomics is a branch of economics that studies the behaviour of individuals and firms in making decisions regarding the allocation of scarce resources and the interactions among these individuals and firms. One goal of microeconomics is to analyze the market mechanisms that establish relative prices among goods and services and allocate limited resources among alternative uses. Microeconomics shows conditions under which free markets lead to desirable allocations. It also analyzes market f

### **Microeconomics - Wikipedia**

Microeconomic theory. This general goal for the text has remained constant over the past thirty years despite vast changes in the actual topics covered. Ideally this is accomplished by including clear, intuitive explanations of the principal results and by stressing the mathematical structure common to most microeconomic problems.
