1. Solving for a single variable in a first degree equation. In an equation such as $a = b / c$ being able to solve for a, b, or c correctly is extremely important. The most common mistake in this situation is thinking that the solution in the case of solving for c is not recognizing that $c = b / a$. Way too often students think that the value for c is equal to a / b .

Course Overview. Information is something that can be encoded in the state of a physical system, and a computation is a task that can be performed with a physically realizable device. Therefore, since the physical world is fundamentally quantum mechanical, the foundations of information theory and computer science should be sought in quantum physics.
