Class practical or Demonstration. This activity compares the colours of three halogens in aqueous solution and in a non-polar solvent. These halogens also react to a small extent with water, forming acidic solutions with bleaching properties.. Halogens undergo redox reactions with metal halides in solution, displacing less reactive halogens from their compounds.

The number e There exists an irrational number that is not represented with a number or a symbol (like π), but rather is represented by the letter e. If you use the e key on your calculator it will give you a decimal approximation of 2.718281828. However, this is only an approximation. Because e is an irrational number, it cannot be completely and accurately represented with a decimal.
