In economics, profit maximization is the short run or long run process by which a firm may determine the price, input, and output levels that lead to the greatest profit. Neoclassical economics, currently the mainstream approach to microeconomics, usually models the firm as maximizing profit.. There are several perspectives one can take on this problem. First, since profit equals revenue minus ...

Introduction to Monetary Valuation. Economic valuation of ecosystem services can provide decision makers with evidence of the social benefits provided by, and tradeoffs among, regulatory alternatives and other ecosystem management or policy actions. Valuation implies a systematic quantification of benefits and costs realized by society in commensurable (typically monetary) units, using methods ...
