Explore forces and motion as you push household objects up and down a ramp. Lower and raise the ramp to see how the angle of inclination affects the parallel forces. Graphs show forces, energy and work.

Ramp: Forces and Motion - PhET

PhET Simulation: The Ramp. published by the PhET. In this simulation, students push common items of varying masses up an incline to explore the relationship of applied force, work, and energy. They control the angle of the ramp, friction, and amount of applied force. With a mouse click, they can also view detailed graphs of work and energy.

Type in (or slide the bar) to choose four different angles for the ramp. For the same applied force (400 N), as you vary the angle, what do you notice about the motion of the crate as it is pushed up the ramp? Select all that apply. A) As the angle increases, the ramp gets steeper. B) As the angle decreases, the ramp gets steeper
