Defense Mechanisms. We go through many, many changes as we move from infancy through childhood to adulthood. The one that came to mind for me the other day as I was holding a friend's new born baby in my arms and thinking about the psychological distance between his infant mind and my own, was a consciousness of all the personality defenses and coping strategies we learn while growing up; how ...

Defense Mechanisms - MentalHelp

In Freudian psychology, displacement (German: Verschiebung, "shift, move") is an unconscious defence mechanism whereby the mind substitutes either a new aim or a new object for goals felt in their original form to be dangerous or unacceptable.. A term originating with Sigmund Freud, displacement operates in the mind unconsciously, its transference of emotions, ideas, or wishes being most often ...
