History. The radiation is named after the Soviet scientist Pavel Cherenkov, the 1958 Nobel Prize winner, who was the first to detect it experimentally under the supervision of Sergey Vavilov at the Lebedev Institute in 1934. Therefore it is also known as Vavilov-Cherenkov radiation. Cherenkov saw a faint bluish light around a radioactive preparation in water during experiments.

The SL-1, or Stationary Low-Power Reactor Number One, was a United States Army experimental nuclear power reactor in the United States which underwent a steam explosion and meltdown on January 3, 1961, killing its three operators. The direct cause was the improper withdrawal of the central control rod, responsible for absorbing neutrons in the reactor core.

### **SL-1 - Wikipedia**

In Canada off-site liability for a nuclear accident is insured under the Nuclear Liability and Compensation Act (2015). Under this legislation, which conforms to international conventions and is conceptually similar to legislation in other countries (such as Price-Anderson in the US), all liability up to a limit of CDN\$1 billion is channelled directly to the operator.

As golden anniversaries go, it's a somber occasion. In a forlorn expanse of desert scarcely an hour's drive northwest of Las Vegas, on Jan. 27, 1951, the Nevada Test Site went into operation by exploding an atomic bomb. During more than a decade, mushroom clouds often rose toward the sky. Winds routinely carried radioactive fallout to communities in Utah, Nevada and northern
