The Polar Habitats. Imagine you're on an area of land that is surrounded by ice and snow. You must be freezing! High winds may be blowing, and it could be hard to tell when day begins or night ends.

### **Polar Habitats Lesson for Kids: Description ... - Study.com**

Antarctica is the coldest place on earth, and the never-ending icebergs, snow drifts and bone chilling winds provide few comforts to animals. The few species of land animals inhabiting the southern-most continent include six types of seals--fur, Ross, Weddell, crab-eater, elephant and leopard--who subsist off of meat from other animals living in their environment.

Winter is always a fun time to talk about arctic animals. I absolutely loved this idea from Discover and Learn Preschool for exploring how arctic animals stay warm in icy water! Animals like walruses, seals, and polar bears all have a thick layer of fat, called blubber, that keeps them warm in the icy waters of the Arctic and Antarctic.

Newton's Apple is an American educational television program produced and developed by KTCA of Minneapolis–Saint Paul, and distributed to PBS stations in the United States that ran from October 15, 1983, to January 3, 1998, with reruns continued until October 31, 1999. The show's title is based on the legend of Isaac Newton sitting under a tree and an apple falling near him — or, more ...

### **Newton's Apple - Wikipedia**

Sea ice arises as seawater freezes. Because ice is less dense than water, it floats on the ocean's surface (as does fresh water ice, which has an even lower density). Sea ice covers about 7% of the Earth's surface and about 12% of the world's oceans. Much of the world's sea ice is enclosed within the polar ice packs in the Earth's polar regions: the Arctic ice pack of the Arctic Ocean and the ...

Pielke, 2018 Since 1990 the world has seen a decrease in overall and weather-related disaster losses as a proportion of global GDP. This trend has occurred even as disaster losses have increased in absolute terms. The primary factor driving the overall increase in disaster losses is societal, mainly growth in populations and settlements at risk to the consequences of extreme events (IPCC, 2012).
