We are uncovering better ways of developing software by doing it and helping others do it. Through this work we have come to value: Individuals and interactions over processes and tools Working software over comprehensive documentation Customer collaboration over contract negotiation Responding to change over following a plan. That is, while there is value in the items on

### **Manifesto for Agile Software Development**

Agile software development is an approach to software development under which requirements and solutions evolve through the collaborative effort of self-organizing and cross-functional teams and their customer(s)/end user(s). It advocates adaptive planning, evolutionary development, early delivery, and continual improvement, and it encourages rapid and flexible response to change.

### **Agile software development - Wikipedia**

The perfect is the enemy of the good. Deploy defenses in depth. Make devices secure by default. Don't scapegoat our users. In the rest of this document, we first explain these principles and discuss some expected use cases for Chromium OS devices.

### **Security Overview - The Chromium Projects**

Founded in 1993 by brothers Tom and David Gardner, The Motley Fool helps millions of people attain financial freedom through our website, podcasts, books, newspaper column, radio show, and premium ...
