Statistics is a branch of mathematics working with data collection, organization, analysis, interpretation and presentation. In applying statistics to, for example, a scientific, industrial, or social problem, it is conventional to begin with a statistical population or a statistical model process to be studied. Populations can be diverse topics such as "all people living in a country" or ...

Evaluating Training and Results (ROI of Training)

Research on historical cases of policy decisions thought to involve groupthink nearly always has been qualitative, rather than quantitative. We propose that observable antecedents and consequences can be used to code incidents in a group's decision process, thereby providing the basis for more rigorous, quantitative analyses.
