I am planning to use dess-martin periodinane and other hypervalent iodine reagents in reactions. Is there any special work up procedures to remove the byproducts of these reagents.

How to work up dess-martin periodinane or hypervalent ...

Despite limited research about the concept to date (Eggermont et al., 2015, Maes and Jacobs, 2015), the term has already diversified. In the United States 'nature-based infrastructure' and 'engineering with nature' are more common as descriptions for actions to support resilience and to reduce flood risk (US Army Corps of Engineers, 2013), and the IUCN and EC definitions of NBS provide ...

Heat travels only from hot to cold. Carnot's principle. In 1824, Sadi Carnot gave a fundamental limitation of steam engines by analyzing the ideal engine now named after him, which turns out to be the most efficient of all possible heat engines. This result is probably best expressed with the fundamental thermodynamical concepts which were fully developed after Carnot's pioneering work ...

The P versus NP problem is a major unsolved problem in computer science. It asks whether every problem whose solution can be quickly verified (technically, verified in polynomial time) can also be solved quickly (again, in polynomial time).. The underlying issues were first discussed in the 1950s, in letters from John Forbes Nash Jr. to the National Security Agency, and from Kurt Gödel to John ...

P versus NP problem - Wikipedia

Emergency and disaster planning involves a coordinated, co-operative process of preparing to match urgent needs with available resources. The phases are research, writing, dissemination, testing, and updating. Hence, an emergency plan needs to be a living document that is periodically adapted to changing circumstances and that provides a guide to the protocols, procedures, and division of ...

Colonial American beverages Hot, non-alcoholic Coffee, tea and chocolate were popular non-alcoholic hot beverages during American Colonial times. These imports were expensive, but not beyond the reach of the average person. Folks too poor to afford the real thing brewed hot beverages from herbs, flowers, bark, roots, and woody stems.

The Food Timeline--beverages

Although water-insoluble cyclodextrin-epichlorohydrin polymers have been known for half a century, these materials are of continued interest to the scientific community, in particular for their interesting environmental applications as sorbents in liquid-solid sorption processes.
