Lesson 2.7: Physical Science – Chemical Reactions & Matter Review H. Turngren, Minnesota Literacy Council, 2014 p.1 GED Science Curriculum SCIENCE Weekly Skill: Lesson Summary: This week students will continue with chemical reactions and the pH scale in the form of a comprehension reading.

Lesson 2.7: Physical Science Chemical Reactions & Matter ...

Identify the Types of Chemical Reactions. There are many different types of chemical reactions. There are single and double displacement reactions, combustion reactions, decomposition reactions, and synthesis reactions. See if you can identify the type of reaction in this ten question chemical reaction classification practice test. Answers appear after the final question.

Chemical Reaction Classification Practice Test - ThoughtCo

Physical Science Test - Final Exam 14 38. (a) (1 point) What is the name of another element in the Periodic Table that is expected to have chemical properties that are similar to the chemical properties of Argon?

Physical Science Test - AAPT.org

There are many cases where the distinctions between physical changes and chemical changes are unclear. For example: The dissolution of salt in water: This seems like a physical change because we know we can recover the salt from the water. However, if we look at the microscopic level, we see that the two types of atoms in salt, sodium and chlorine, separate from one another.
