CodyCross Planet Earth Answers - CodyCross Answers All ...

Earth is the third planet from the Sun, and the only astronomical object known to harbor life. According to radiometric dating and other sources of evidence, Earth formed over 4.5 billion years ago. Earth's gravity interacts with other objects in space, especially the Sun and the Moon, Earth's only natural satellite. Earth orbits around the Sun in 365.26 days, a period known as an Earth year.

Earth - Wikipedia

A planet is an astronomical body orbiting a star or stellar remnant that is massive enough to be rounded by its own gravity, is not massive enough to cause thermonuclear fusion, and has cleared its neighbouring region of planetesimals.. The term planet is ancient, with ties to history, astrology, science, mythology, and religion. Five planets in the Solar System are visible to the naked eye.

Planet - Wikipedia

About Zecharia Sitchin. One of the few scholars able to read and interpret ancient Sumerian and Akkadian clay tablets, Zecharia Sitchin (1920-2010) based his bestselling The 12th Planet on texts from the ancient civilizations of the Near East. Drawing both widespread interest and criticism, his controversial theories on the Anunnaki origins of humanity have been translated into more than 20 ...
