Programmable Logic Controller Questions and Answers

An arithmetic logic unit (ALU) represents the fundamental building block of the central processing unit of a computer. An ALU is a digital circuit...

Arithmetic Logic Unit (ALU): Definition, Design & Function ...

Prolog is a logic programming language associated with artificial intelligence and computational linguistics.. Prolog has its roots in first-order logic, a formal logic, and unlike many other programming languages, Prolog is intended primarily as a declarative programming language: the program logic is expressed in terms of relations, represented as facts and rules.

Prolog - Wikipedia

In procedural programming, you will need to include all the text and notes in the program so the band members can play it. However, you want to have another band play the song in another program.

Object-Oriented Programming vs. Procedural Programming ...

Data driven programming is a programming model where the data itself controls the flow of the program and not the program logic. It is a model where you control the flow by offering different data sets to the program where the program logic is some generic form of flow or of state-changes.

What is data-driven programming? - Stack Overflow

Digital Electronics questions and answers with explanation for interview, competitive examination and entrance test. Fully solved examples with detailed answer description, explanation are given and it would be easy to understand.

Digital Electronics Questions and Answers - Aptitude

Different programming languages provide different types of abstraction, depending on the intended applications for the language. For example: In object-oriented programming languages such as C++, Object Pascal, or Java, the concept of abstraction has itself become a declarative statement - using the keywords virtual (in C++) or abstract and interface (in Java).

Abstraction (computer science) - Wikipedia
