Physics - Chapter 12 Assignment Answers. Ch 12 Review Answers: Newton thought that a force must act on the Moon because, since it moves in a curved (almost, but not quite) circular path, it is accelerating. After all, the direction of its velocity is constantly changing, and acceleration is the rate velocity changes. An acceleration requires a ...

Physics Ch 12 Assignment Answers

To solve this problem, use Newton's law of universal gravitation: We are given the value of the force, the distance (radius), and the gravitational constant. We are also told that the masses of the two satellites are equal. Since the masses are equal, we can reduce the numerator of the law of gravitation to a single variable.
