Solved it! There are 2 ways you can go about solving this. Go over here and follow user ndasusers answer. It will both create the keyN.db and certN.db files you need but also another one GMail SSL certificate that will solve another potential problem.; Or you can just copy the keyN.db and certN.db into a folder (/etc/ssl/cert maybe) and direct mail.rc there like so:

A space elevator is a proposed type of planet-to-space transportation system. The main component would be a cable (also called a tether) anchored to the surface and extending into space. The design would permit vehicles to travel along the cable from a planetary surface, such as the Earth's, directly into space or orbit, without the use of large rockets.
