Best Answer: Some people think that a quantum leap is a particularly large leap. This is incorrect. In fact, in quantum physics, where the expression came from, a quantum leap is usually a very tiny leap indeed, often smaller than the diameter of the nucleus of an atom. So what is a quantum leap? A quantum ...

What is a "quantum leap"? | Yahoo Answers

General Physics Experiment 12. Optical Spectra and Emission Lines. ... Photons of light are emitted whenever an electron makes a quantum leap in its orbit from a higher energy level to a lower energy level. The three lines you will see in the visible spectrum are caused by the electrons falling from the third, fourth, and fifth levels into the ...
