Adding power factor correction capacitors provides well-known benefits to industrial plants. These benefits include power factor correction, voltage support, and release of system capacity. Engineering judgment must be used, however, when applying capacitors in power systems with excessive harmonics and/or transients. Capacitors might not survive long in such environments if they are ...

Introduction The Mazilli ZVS flyback driver is well-known throughout the high voltage community for its simplicity and ability to deliver 20-50 kV at high currents for a flyback transformer. I build this circuit almost a year ago on a vero board, but it kept blowing the thin traces due to high currents flowing. ...
