This answer is based on the fact that renaming the user account does not automatically change the profile path. If the account was renamed but the profile path was not changed, the path-name can be found in the registry under HKEY\_LOCAL\_MACHINE\SOFTWARE\Microsoft\Windows NT\CurrentVersion\ProfileList in the item named ProfileImagePath whose value will be C:\Users\old-user-name.

### **How to identify the (original) user profile name from a ...**

This post explains there are actually both WSS and MOSS profiles and that you need to do profile synchronization between them. (If you look at your profile in SSP Admin you probably do see the update after the import runs, but the site itself has not been updated).
