The dictionary definition of physics is “the study of matter, energy, and the interaction between them”, but what that really means is that physics is about asking fundamental questions and trying to answer them by observing and experimenting.

What is physics?| Explore | physics.org

Sir Isaac Newton developed three laws of motion that govern classical physics. The laws are as follows: 1. An object in motion stays in motion unless acted on by an outside force. This same rule applies to objects at rest. This is called the Law of Inertia. 2. Acceleration comes from when a force ...
