Biology is the natural science that studies life and living organisms, including their physical structure, chemical processes, molecular interactions, physiological mechanisms, development and evolution. Despite the complexity of the science, there are certain unifying concepts that consolidate it into a single, coherent field. Biology recognizes the cell as the basic unit of life, genes as ...

A content note generally contains useful information and explanations that do not fit into the primary text itself. Content notes may be given as footnotes or endnotes or even a combination of both footnotes and endnotes. Such content notes may themselves contain a style of parenthetical referencing, just as the main text does.

a sudden change in the environment (e.g. an earthquake, flood, or fire) that drastically reduces the size of a population. The few survivors that pass through the restrictive bottleneck may have a gene pool that no longer reflects that original population's gene pool. E.g. the population of california condors was reduced to 9 individuals.

I. Introduction. Starch is the major component of human diet and is also used for many food and nonfood/industrial applications (Gaillard, 1987, FAO, 2006a).A significant quantity of starch is further processed by subjecting it to various forms of chemical and physical modifications, resulting in starches with even greater functionality attributes (Zobel, 1992).
