Quantitative genetics is a branch of population genetics that deals with phenotypes that vary continuously (in characters such as height or mass)—as opposed to discretely identifiable phenotypes and gene-products (such as eye-colour, or the presence of a particular biochemical).. Both branches use the frequencies of different alleles of a gene in breeding populations (gamodemes), and combine ...

A correlation expresses the strength of linkage or co-occurrence between two variables in a single value between -1 and +1. This value that measures the strength of linkage is called correlation coefficient, which is represented typically as the letter  $r$ . The correlation coefficient between two continuous-level variables is also called Pearson's  $r$  or Pearson product-moment correlation ...
