This course on "Soil Dynamics" discusses about the behaviour and properties/response of soil as a material which is subjected to various types of dynamic or cyclic time-dependent loadings. Also the design and analysis for machine foundations come along with this course to consider the dynamic properties of both soil and foundation as ...

NPTEL Phase II :: Civil Engineering - Soil Dynamics

elastodynamic solutions of the problems considered in this chapter are given in chapters 11 – 13. In soil mechanics the elastostatic solutions for a line load or a distributed load on a half plane are of great importance because they provide basic solutions for the stress distribution in soils due to loads on the surface.
