Pielke, 2018 Since 1990 the world has seen a decrease in overall and weather-related disaster losses as a proportion of global GDP. This trend has occurred even as disaster losses have increased in absolute terms. The primary factor driving the overall increase in disaster losses is societal, mainly growth in populations and settlements at risk to the consequences of extreme events (IPCC, 2012).

The glossary that follows assumes a definition of ecology--the study of interactions between organisms and their environment--much wider than what fits under the field's habitual statistical persona. Ecofeminism and ecopsychology are mentioned, for example, as are terms from organic gardening and permaculture.

A Glossary of Ecological Terms - Terrapsych.com

Adaptation is an observable fact of life accepted by philosophers and natural historians from ancient times, independently of their views on evolution, but their explanations differed. Empedocles did not believe that adaptation required a final cause (~ purpose), but thought that it

"came about naturally, since such things survived." Aristotle did believe in final causes, but assumed that ...

Silviculture is the practice of controlling the growth, composition, health, and quality of forests to meet diverse needs and values.. The name comes from the Latin silvi-(forest) + culture (as in growing). The study of forests and woods is termed silvology. Silviculture also focuses on making sure that the treatment(s) of forest stands are used to preserve and to better their productivity.
