I've been evaluating the various Common Lisp testing frameworks. I have a large body of code in my Project Euler stuff, and I use unit testing extensively; extensively enough that the simplistic unit testing package I had been using was getting unwieldy. So I figured I'd take a look at what was available and see how everything stacked up.

Explain what is Standard Deviation, Skewness and Kurtosis. Answer is kinda extra, because it was tough to find. Standard Deviation: a quantity expressing by how much the members of a group differ from the mean value for the group. The Standard Deviation is a more accurate and detailed estimate of dispersion because an outlier can greatly exaggerate the range (as was true in this example where ...
