The following are multiple choice questions in a style similar to those included in the USMLE step 1. The main topic here is basic principles of pharmacology.

USMLE-like pharmacology quiz. Part 1: general principles ...

Dosing and administration: All DPP-4 inhibitors currently approved for use in the U.S. are administered orally once daily, although the specific dosing parameters for each individual agent varies, as summarized in Table 2. 19-22 With the exception of linagliptin, the DPP-4 inhibitors are primarily cleared by the kidneys and, thus, require renal dose adjustment. 23

Type 2 Diabetes—Pathophysiology and Pharmacology Review ...

The most commonly used mu-opioid agonists include morphine, fentanyl, hydromorphone, and oxycodone. 29 Methadone is an agonist at mu-opioid receptors and also an antagonist at NMDA receptors. However, because of its complex pharmacokinetics and unique safety considerations, methadone should only be used by experienced practitioners and is outside the scope of this program.

Epidemiology is the study and analysis of the distribution (who, when, and where) and determinants of health and disease conditions in defined populations.. It is the cornerstone of public health, and shapes policy decisions and evidence-based practice by identifying risk factors for disease and targets for preventive healthcare. Epidemiologists help with study design, collection, and ...

Epidemiology - Wikipedia

The ability of various pollutants (and their derivatives) to mutually affect their toxic actions complicates the risk assessment based solely on environmental levels (Calabrese, 1991). Deleterious effects on populations are often difficult to detect in feral organisms since many of these effects tend to manifest only after longer periods of time.
