This activity explores the concepts and research on the evolutionary origins of humans discussed in the short film Great Transitions: The Origin of Humans.. The Origin of Humans is part of BioInteractive's Great Transitions film collection. The film highlights the most important hominid fossil discoveries of the past 50 years and the insights they provide into human evolution.

Activity for The Origin of Humans | HHMI BioInteractive

Unicellular Definition. A unicellular organism is an organism that consists of a single cell. This means all life processes, such as reproduction, feeding, digestion, and excretion, occur in one cell. Amoebas, bacteria, and plankton are just some types of unicellular organisms. They are typically microscopic and cannot be seen with the naked eye.

Internet Lessons Note For Teachers: Please take time to preview the links on any Internet assignment before you use it with your students. With the ever-changing nature of the Internet, links may become broken or websites are no longer available. If you find a problem, please send me an e-mail. • The Organ Trail - Challenge your students to create a "Wanted" poster about an organ.

The Science Spot

Biology is the "science of life." It is the study of living and once-living things, from submicroscopic structures in single-celled organisms to entire ecosystems with billions of interacting organisms; it further ranges in time focus from a single metabolic reaction inside a cell to the life history of one individual and on to the course of many species over eons of time.
