Physics (from Ancient Greek: φυσική (ἐπιστήμη), romanized: physikḗ (epistḗmē), lit. 'knowledge of nature', from φύσις phýsis "nature") is the natural science that studies matter, its motion, and behavior through space and time, and that studies the related entities of energy and force. Physics is one of the most fundamental scientific disciplines, and its main goal is ...

Physical cosmology is a branch of cosmology concerned with the studies of the largest-scale structures and dynamics of the universe and with fundamental questions about its origin, structure, evolution, and ultimate fate. Cosmology as a science originated with the Copernican principle, which implies that celestial bodies obey identical physical laws to those on Earth, and Newtonian mechanics ...

Purpose of study. A high-quality science education provides the foundations for understanding the world through the specific disciplines of biology, chemistry and physics.

National curriculum in England: science programmes of study

1. Introduction. Offensive or obscene language, known as cursing in the US and swearing in the UK (Soanes, 2002), is a near-universal feature of human language (Van Lancker & Cummings, 1999). To swear may be defined as to utter a word or phrase that is considered taboo, or in other words, forbidden (Pinker, 2007). This may be due to offense against a minority (e.g. derogatory terms referencing ...
