Gender is the range of characteristics pertaining to, and differentiating between, masculinity and femininity. Depending on the context, these characteristics may include biological sex (i.e., the state of being male, female, or an intersex variation), sex-based social structures (i.e., gender roles), or gender identity. Many if not most societies use a gender binary, having two genders, men ...

Gender - Wikipedia

The history of the race and intelligence controversy concerns the historical development of a debate, concerning possible explanations of group differences encountered in the study of race and intelligence. Since the beginning of IQ testing around the time of World War I there have been observed differences between average scores of different population groups, but there has been no agreement ...

History of the race and intelligence controversy - Wikipedia

Abstract The purpose of this study is to explore the link between job satisfaction and organisational performance and to determine if there is an empirically provable relationship between these two variables, and the direction and the intensity of this relationship. Empirical research was conducted on a research sample of 40 large- and medium-sized Croatian companies, with 5806 employees surveyed.
