Lumitec makes surface-mount underwater lights in both bronze and aluminum housings. The installation instructions say not to bond the lights. An engineer at the company said that poorly engineered bonding systems aboard a boat, or stray current in the water around said boat—a common situation in marinas—can result in corrosion in bonded fittings, but won't affect unbonded ones.

Ocean thermal energy conversion (OTEC) uses the temperature difference between cooler deep and warmer shallow or surface seawaters to run a heat engine and produce useful work, usually in the form of electricity. OTEC can operate with a very high capacity factor and so can operate in base load mode.. Among ocean energy sources, OTEC is one of the continuously available renewable energy ...

A transistor is a semiconductor device used to amplify or switch electronic signals and electrical power. It is composed of semiconductor material usually with at least three terminals for connection to an external circuit. A voltage or current applied to one pair of the transistor's terminals controls the current through another pair of terminals. Because the controlled (output) power can be ...
