General semantics is a self-improvement and therapy program begun in the 1920s that seeks to regulate human mental habits and behaviors. After partial launches under the names human engineering and humanology, Polish-American originator Alfred Korzybski (1879-1950) fully launched the program as general semantics in 1933 with the publication of Science and Sanity: An Introduction to Non ...

A microscope is an instrument used to see objects which are not directly visible to naked eyes. The word microscope is derived from the Latin word 'micro' (=small) and the Greek word 'skopos' (=to look at). The present decade's development in science and technology produced varied types of microscopes with wide and diverse applications.

Agenda 21 In One Easy Lesson Update, February 15, 2018: I'm very happy to report that the globalist Agenda 21 thinly disguised Communist Collectivism scheme described in this article is failing miserably within the United States thanks to a steady drop in membership by American cities and towns. There were nearly 700 American cities that were members of ICLEI in 2011, but thankfully that number ...

Report from Iron Mountain, Part 1: Report from Iron Mountain unveils a hitherto top-secret report of a government commission that was requested to explore the consequences of lasting peace on American society. The shocking results of the study, as revealed in this report, led the government to conceal the existence of the commission--they had found that, among other things, peace may never be ...

Synthetic Religion. The "synthetic" oil business is regarded by many in the oil industry as a "religion" whose followers are holding a belief that "synthetic" is somehow superior, but lack the actual proof. This "faith" is very profitable for all marketers of "synthetic" products, as they can charge substantially higher price when the term "synthetic" is incorporated in to the product description.

**All about Synthetic Motor Oil - SynLube**

A wide array of biological questions exist that can be answered with live cell imaging. A few of the most popular applications include the examination of structural components of a cell, the study of dynamic processes, and the localization of molecules.
