science math history literature technology health law business All Sections Science / Chemistry / Chemical Equations Which law of physical science must be followed when balancing chemical equations?

Which law of physical science must be ... - answers.com

Best Answer: Alright basically, when you are balancing an equation, you want both sides to have the same amount of elements. The law states that matter cannot be created nor destroyed. So you can't create new elements and destroy any. So we'll count how many elements are in each side. Clearly, they are not balanced.
