Orthotics (Greek: ὀρθός, romanized: ortho, lit. 'to straighten, to align') is a medical specialty that focuses on the design and application of orthoses. An orthosis (plural: orthoses) is "an externally applied device used to modify the structural and functional characteristics of the neuromuscular and skeletal system". An orthotist is the primary medical clinician responsible for the ...

It is said that over 80% of diagnoses are made on history alone, a further 5-10% on examination

and the remainder on investigation. [1] Whether this adage is true or not may be open to debate but it is clear that history and examination skills remain at the very core of clinical practice. This ...
