Information economics or the economics of information is a branch of microeconomic theory that studies how information and information systems affect an economy and economic decisions. Information has special characteristics: It is easy to create but hard to trust. It is easy to spread but hard to control.

In accounting, the Inventory turnover is a measure of the number of times inventory is sold or used in a time period such as a year. It is calculated to see if a business has an excessive inventory in comparison to its sales level. The equation for inventory turnover equals the cost of goods sold divided by the average inventory. Inventory turnover is also known as inventory turns, merchandise ...

1. Introduction. The possibility that firms can develop a competitive edge over rivals by investing in social responsibility has been made increasingly likely over recent years by changes in investors' behavior and attitudes towards the society (Graves and Waddock, 1994, Saleh et al., 2010, Wahba, 2008b, Wahba and Elsayed, 2014a). As such, the concept of corporate social responsibility (CSR ...

La economía matemática es la aplicación de métodos matemáticos para representar teorías y analizar problemas en la economía. Por convención, los métodos aplicados se refieren a aquellos que van más allá de geometría simple, como cálculo diferencial e integral, ecuaciones diferenciales, álgebra de matrices, programación matemática y otros métodos computacionales.

This article examines corporate debt values and capital structure in a unified analytical framework.

It derives closed-form results for the value of long-term risky debt and yield spreads, and for optimal capital structure, when firm asset value follows a diffusion process with constant volatility. Debt values and optimal leverage are explicitly linked to firm risk, taxes, bankruptcy costs ...
