NOTE. DHCP on domain controllers You should not configure the DHCP service on a computer that is also a domain controller to perform dynamic DNS updates. If a DHCP server exists on a domain controller, the DHCP server has full control over all DNS objects stored in Active Directory because the account it is running under (the domain controller computer account) has this privilege.

Genomics is an interdisciplinary field of biology focusing on the structure, function, evolution, mapping, and editing of genomes. A genome is an organism's complete set of DNA, including all of its genes. In contrast to genetics, which refers to the study of individual genes and their roles in inheritance, genomics aims at the collective characterization and quantification of all of an organism ...
