PhyzJob: Field Concepts 1. What is a field? What information is communicated when one speaks of a gravitational field or electric field? 2a. What must an object have to create a gravitational field? b. What must an object have to create an electric field? 3a. What types of objects are affected by a gravitational field, and what effect(s) ...

PhyzJob: Field Concepts - J.T. Schemm

Best Answer: B. zero The symmetrical distribution of charge about the center of the ring causes the resultant field at the center to be canceled. For every E-vector resulting from a bit of charge on the ring, there is an equal and diametrically opposed bit of charge, creating an equal and opposite E-vector, resulting in net cancellation of the E-field at the exact center of the ring.
