A Punnett Square * shows the genotype * s two individuals can produce when crossed. To draw a square, write all possible allele * combinations one parent can contribute to its gametes across the top of a box and all possible allele combinations from the other parent down the left side. The allele combinations along the top and sides become labels for rows and columns within the square.

Welcome to your third Genetics Workshop. Here we will go slowly and systematically through the steps needed to do chi-square analysis. This Workshop is divided into three different problems and a summary of general ideas.

Genetics Workshop Number Three. : The Chi-Square.

There are many types of cells. In biology class, you will usually work with plant-like cells and animal-like cells. We say "animal-like" because an animal type of cell could be anything from a tiny microorganism to a nerve cell in your brain. Biology classes often take out a microscope and look at single-celled microbes from pond water.
