The above numerical scores are calculated from your answers to the Sampler questionnaire. If you have answered honestly and accurately, your basic personality type should be one of the top three scores. (You might want to print out this result; if you do not, you will have to retake the Sampler if you want these [...])

Individuals who have made the transition from Excel to an inventory management solution, like Wasp's Inventory Control system, have seen a quick return on the investment. For example, Lee Letawsky, parts technician and purchaser for Precision Drilling Trust, stated the following, "If you're not in control of your inventory, you don't know what you have."

4 Reasons Why Excel for Inventory Management Doesn't Work

A classification model (classifier or diagnosis) is a mapping of instances between certain classes/groups. The classifier or diagnosis result can be a real value (continuous output), in which case the classifier boundary between classes must be determined by a threshold value (for instance, to determine whether a person has hypertension based on a blood pressure measure).
