Oxygen is the chemical element with the symbol O and atomic number 8. It is a member of the chalcogen group on the periodic table, a highly reactive nonmetal, and an oxidizing agent that readily forms oxides with most elements as well as with other compounds. By mass, oxygen is the third-most abundant element in the universe, after hydrogen and helium. At standard temperature and pressure, two ...

1. Introduction. Since the massive Cyanobacteria dominated algal bloom, which occurred in early June 2007 and was a reason to shut down drinking water plants, the water quality of Lake Taihu has aroused extraordinary concerns from all stakeholders, including government, researchers, and the public (). Since some measures have been done for pollution control and treatment over the last decades ...
