Some of the major unsolved problems in physics are theoretical, meaning that existing theories seem incapable of explaining a certain observed phenomenon or experimental result. The others are experimental, meaning that there is a difficulty in creating an experiment to test a proposed theory or investigate a phenomenon in greater detail.. There are still some deficiencies in the Standard ...

Speed is the distance traveled divided by the time of travel. For example; if you were to travel a distance of 10 miles in 2 hours time, then your average speed equals 5 miles per hour. $s=d/t$ (s =speed, d =distance, t =time, and the $/$ means to divide). The word velocity is very similar to speed (except velocity also has a direction called a vector) and in most cases we will now use the letter " v ...

Information is the resolution of uncertainty; it is that which answers the question of "what an entity is" and thus defines both its essence and nature of its characteristics. Information relates to both data and knowledge, as data is meaningful information representing values attributed to parameters, and knowledge signifies understanding of a concept.

Experiment with an electronics kit! Build circuits with batteries, resistors, light bulbs, and switches.

Determine if everyday objects are conductors or insulators, and take measurements with an ammeter and voltmeter. View the circuit as a schematic diagram, or switch to a lifelike view.

Particle Wave Duality is False. Authors: Adham Ahmed Mohamed Ahmed Comments: 1 Page. ty if you push a mass to the speed of light it takes a lot of work now if you push a larger mass it take a larger work to push it at a time larger by the larger mass/mass coefficient velocity here is all that matters do you think electromagnetic waves has inertia if it has mass do waves have inertia? arent ...

Why do objects like wood float in water? Does it depend on size? Create a custom object to explore the effects of mass and volume on density. Can you discover the relationship? Use the scale to measure the mass of an object, then hold the object under water to measure its volume. Can you identify all the mystery objects?

1 Periodic Table of the Elements – Cylinder with Bulges. The main purpose of any periodic table of the elements is to help us understand the relationships among the various elements. We want to construct a “periodic table” that is a reasonably faithful representation of the observed relationships.

While redshift can be used to tell us about the recession velocity of (non relativistic) galaxies, we also need to find a way to measure the distance to these galaxies. Astronomers have two main methods to measure these distances; parallax (more parallax here) and cepheid variable stars - there's a Khan Academy video on cepheid variable stars.

Learn about the fundamental concepts of chemistry including structure and states of matter, intermolecular forces, and reactions. You'll do hands-on lab investigations and use chemical calculations to solve problems. Note: Save your lab notebooks and reports; colleges may ask to see them before granting you credit.
