Agreeing with chessmath and choster, I'd like to add a few cents of my own. User documentation may refer to subject matter i.e. Project, Team, Test, System, Administrative, Marketing or Miscellaneous types. For every such subject matter, certain instructions (for using i.e. a user guide) or reference manuals need to be created for packaging it along with a certain product or service.

@excaza. When we use pwd in app designer, this function finds MATLAB current folder in main window not the path that the designed app is running there (we don't have this problem in GUIDE). When we run an app in GUIDE, this app changes the current folder of MATLAB to GUIDE app, so pwd function finds the app path (same as current folder of MATLAB in this situation). - user2991243 Aug 17 '16 at ...

The biases and weights in the Network object are all initialized randomly, using the Numpy np.random.randn function to generate Gaussian distributions with mean \$0\$ and standard deviation \$1\$. This random initialization gives our stochastic gradient descent algorithm a place to start from. In later chapters we'll find better ways of initializing the weights and biases, but this will do for now.
