If the trend line equation is not 'close enough' than what kind of precision are you looking for? You can get a polynomial to the 6th order as well as other types of equations.

### **Finding Points of Intersection In Excel Plots - Stack Overflow**

I would suggest starting with the simple one and then only worrying about introducing the fast requirement if it turns out to be an issue.. Far too much time is wasted on solving problems that do not exist (see YAGNI).. By simple, I mean simply starting a checksum character (all characters here are unsigned) at zero, reading in every character and subtracting it from the checksum character ...
