Muscular System Definition The muscular system is a set of tissues in the body with the ability to change shape. Muscle cells contain a variety of proteins which help them contract in size. The proteins form fibers, which connect various parts of the cells. The main proteins used are actin and myosin. As seen in [...]

Class practical. Reebops are imaginary animals, made from marshmallows (or foam packing pieces). Their features are determined by the characteristics encoded in their chromosomes. Both parents are heterozygous for all their characteristics (except their sex). Making models in this way has proved very popular with post-16 students – many of whom keep their baby Reebops at home and talk of them ...
