Mitochondria - Turning on the Powerhouse Mitochondria are known as the powerhouses of the cell. They are organelles that act like a digestive system which takes in nutrients, breaks them down, and creates energy rich molecules for the cell. The biochemical processes of the cell are known as cellular respiration. Many of the reactions involved in cellular respiration happen in the mitochondria.

Carbon dioxide (chemical formula CO₂) is a colorless gas with a density about 60% higher than that of dry air. Carbon dioxide consists of a carbon atom covalently double bonded to two oxygen atoms. It occurs naturally in Earth's atmosphere as a trace gas. The current concentration is about 0.04% (410 ppm) by volume, having risen from pre-industrial levels of 280 ppm.

Carbon dioxide - Wikipedia

Study the core scientific principles, theories, and processes that govern living organisms and biological systems. You'll do hands-on laboratory work to investigate natural phenomena.

4. Malaria is a leading cause of infectious disease. Over 300 million people in the tropics are infected each year, and the death rate is 2 million people per year.

Chapter 28: Protists - Biology Junction

Your feedback probably stinks nothing personal ;). More commonly, students receive feedback but it doesn't do a whole lot of good. Kluger and DeNisi conducted a meta-analysis of studies of feedback and found that the average effect of writing feedback intervention on performance was quite positive.. However, 38 percent of the time the control group actually outperformed the feedback groups ...

Give Your Students Better Writing Feedback

Chemical reaction: Chemical reaction, a process in which one or more substances, the reactants, are converted to one or more different substances, the products. Substances are either chemical elements or compounds. A chemical reaction rearranges the constituent atoms of the reactants to create different substances as products.
